Reasons for Allowance

Claim 2 is allowed for the reason the prior art does not teach or suggest in claimed combination, "... a shift operation/reference position selecting section for generating a reference position signal and a shift operation select signal from coordinate of main scanning direction and coordinate of sub scanning direction within the block; and a shift operation section for carrying out shift operations from pixel data and phase quantity supplied to an operation circuit, which is selected by the shift operation select signal."

Claims 5-7 are allowed for the reason the prior art does not teach or suggest in claimed combination, "... shift quantity judging means for determining distribution of shift quantity to the shifted pixel of respective pixels within the block on the basis of the phase quantity, values of respective pixels within the block and value of the shifted pixel; and a shift operation section for shifting the shift quantity to the shifted pixel."

Art Unit: 2626

Claim 11 is allowed for the reason the prior art does not teach or suggest in claimed combination, "... wherein the image processing apparatus serves to process color image, and the shifted pixel designating section determines shift pixel positions in such a manner that angles of lie of which shifted pixels are disposed in a distributed manner are caused to be different with respect to plural images obtained by carrying out color separation of color image."
